

Lencore

THE LEADING MANUFACTURER OF SOUND MASKING SYSTEMS.

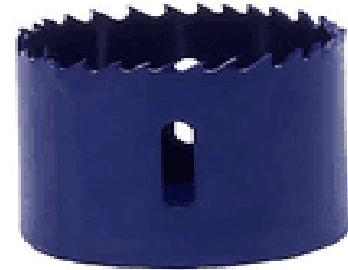

A GREAT SOUND MAKES NO NOISE®

CROSSNET-ONE™ SOUND MASKING SYSTEM

Hole Saw Specifications – Model #CN-BP4

When specifying the CrossNetOne™ standard speaker model #CN-BP2, Lencore's Hole Saw model #CN-BP4 can be used to help facilitate the installation.

Bimetal hole saw has shock resistant teeth that stay sharper longer and can easily cut holes into ceiling tiles, wood, plastic, nail embedded woods, plywood, and any machine-able metal. The positive rake provides more aggressive cutting action and chip clearance for an easy cut.

Hole Saw 3 1/2"

When a direct field speaker or system is required due to site conditions or application need, the CrossNetOne™ system provides the highest level of sound quality and adjustability. CrossNetOne™ offers a commercial grade direct field system using higher quality construction and sound quality than competitive systems.

SPECIFICATIONS

Saw Diameter: 3 1/2"
