

Lencore

THE LEADING MANUFACTURER OF SOUND MASKING AND ACOUSTICAL PANEL SOLUTIONS.

A GREAT SOUND MAKES NO NOISE®

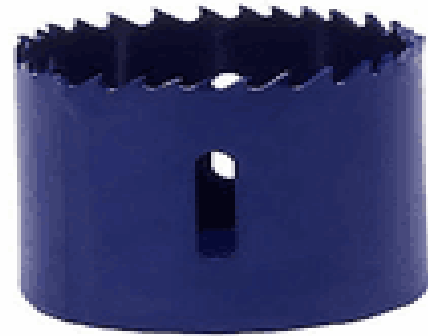

LENCORE CROSSWAYS™ SOUND MASKING SYSTEM

Hole Saw - Model BP4

When a direct field speaker or system is required due to site conditions or application need, the Lencore Crossways™ system provides the highest level of sound quality and adjustability. Crossways™ offers a refreshing commercial grade direct field system using a higher quality construction and sound quality than competitive systems.

When specifying the Crossways™ small speaker, Lencore's Hole Saw model BP4 can be used to help facilitate the installation.

Bimetal hole saw has shock resistant teeth that stay sharper longer and can easily cut holes into ceiling tiles, wood, plastic, nail embedded woods, plywood, pipe, stainless steel, and any machine-able metal. The positive rake provides more aggressive cutting action and chip clearance for an easy cut.

Hole Saw 3 1/2"
