THE LEADING MANUFACTURER OF SOUND MASKING SYSTEMS.

A GREAT SOUND MAKES NO NOISE®

## CROSSWAYS-ONE™ SOUND MASKING SYSTEM

**INFRA-RED HUB Specifications - Model #GP482gsa**

**INFRA-RED Wall Controller Specifications - Model #GP42gsa**

**GSA Advantage!**

The Infra-Red Hub component allows for more than one wall controller switch plate to be installed in a Platform Infra-Red port giving single Platform audio channel control to a respective wall controller switch plate. Up to four wall controller switch plates may be installed in each hub allowing four wall controller switch plates to be installed per each Platform.

Using an Infra-Red hub channel, one can make volume and contour control adjustments for masking, page and music by pointing a remote control at the Infra-Red wall controller unit.

This type of application can be typically used for private offices, various spaces, conference rooms, health care facilities, and areas where remote control adjustments are required.

When a direct field speaker or system is required due to site conditions or application need, the CrosswaysOne™ system provides the highest level of sound quality and adjustability. CrosswaysOne™ offers a commercial grade direct field system using higher quality construction and sound quality than competitive systems.

Tunable by hand-held remote and available in standard and larger speaker sizes. CrosswaysOne™ offers wider sound dispersion, better sound uniformity and greater sound quality.

Random sound masking source, coupled with Lencore's E-Sound™ technology provide capabilities for:

- Attenuation Adjustments: 96 in ½ dB steps
- Contour Adjustments: 29 steps

**INFRA-RED WALL CONTROLLER AND INFRA RED-HUB**

## TECHNICAL SPECIFICATIONS

### **Infra-Red Hub**

#### **Enclosure:**

Aluminum housing

**Dimensions:** 5" × 7" × 2"

**Power supply:** 48 VDC

#### **General Specifications:**

Paging Input: via Platform

Power Requirement: Powered by Platform

Output Adjustment: N/A

### **Infra-Red Wall Controller**

**Standard size white plate with Infra-Red receiver.**

**Dimensions:** 4.5 "× 2.8"

#### **Wire Requirements:**

Cat 5e cable or equivalent 4 twisted pair with standard RJ 45 connector
