## Lencore's Spectra i.Net<sup>®</sup> System Wins *Buildings* Top Money Saving Product Award

(Woodbury, New York) — *Buildings Magazine* awarded Lencore with its 2010 Top Buildings Money Saving Product Award for Lencore's Spectra i.Net<sup>®</sup> Networked Sound Masking System.

Hundreds of products were reviewed by the publication's editorial staff and an elite group was chosen based on factors that the editors felt would save readers money in terms of their utility bills, time, employee productivity and product longevity – all categories where Spectra i.Net<sup>®</sup> excelled.

The editors of *Buildings* were impressed with the Lencore system's ability to provide multiple system functionality (masking, paging and music) through one system. In addition, the system's network capabilities also proved to be a value point for the review committee when considering the savings that could result from reduced travel expenses due to system's remote accessibility through the web.

“Our clients are always looking for ways to save money, add value and improve productivity. With the Spectra i.Net<sup>®</sup> System they can do this and more while benefiting from the privacy and comfort that our system provides,” states Jodi Jacobs, Lencore's Director of Marketing. She adds, “We are indeed very pleased to be recognized by Buildings Magazine as a Top Money Saving Product for 2010.”

The award winning Lencore product is featured in the June 2010 issue of *Buildings Magazine* and is listed on the *Buildings* website at [www.buildings.com](http://www.buildings.com).

### **About Spectra i.Net®**

The Spectra i.Net® with Music Page Interface (MPI) provides three distinct systems (masking, paging and music) and includes a user-friendly web interface for 24/7 access to the system. The system is capable of separately and independently configuring zones for sound masking, paging and music via the network. Through the Sound Manager, the Spectra i.Net's® web interface and central system control, the system has tremendous control capabilities.

Simplifying and speeding control, the Sound Manager is included with every Spectra i.Net® System and is a password protected, web-based user interface based on an open architecture software platform that is used to control and monitor the finished system.

Lencore's Sound Manager can be configured to be securely accessed from any computer connection, either on site, or remotely.

### **About Buildings**

*Buildings Magazine* serves 72,000 building owners and professional facilities managers - the key decision-makers in commercial, institutional and governmental real estate in North America. The monthly publication offers readers information on the development, construction, modernization, management and operation of buildings, as well as the products and services needed to support such facilities.

### **About Lencore Acoustics Corp.**

Lencore manufactures sound masking, paging and music systems including networked systems, in-plenum systems, direct fired systems, networked direct fired systems, centralized, decentralized, and remote sound masking systems. Lencore systems are UL listed for use in air-handling spaces and have been independently tested to meet ASTM standards for speech privacy. For more information on Lencore's sound masking and paging systems, contact Lencore at [info@lencore.com](mailto:info@lencore.com).
