Lencore is on GSA Contract

June 2009 (Woodbury, New York) — Lencore now offers its CrosswaysOne™ Direct Fired Sound Masking and Paging System on GSA Advantage and is proud to announce that it has been awarded a GSA contract for purchase of equipment under FSC Class 5830 – Intercommunication and Public Address Systems.

Lencore is dedicated to providing its government clients with a choice for sound masking systems that address speech privacy and noise issues in office environments. Having worked previously with many government clients off schedule, Lencore's GSA contract will now make the purchasing of sound masking even easier for government clients. Purchases for Lencore products can be made off of the GSA Advantage website or through Lencore directly.

Lencore Sound Masking Systems are the best acoustical solution for providing speech privacy while minimizing noise and distractions. Accepted as a proven practice for decades, Lencore systems minimize distractions and create more productive office spaces. On GSA Lencore offers its CrosswaysOne™ System with the added option of providing all call paging.

The CrosswaysOne™ System

CrosswaysOne™ is the industry leader in direct-fired systems offering a wider dispersion and greater sound quality. The system delivers the broadest sound spectrum with the highest level of speech privacy and comfort. The system is tunable by hand-held remote. In addition, Lencore is

the only sound masking company that offers direct fired speakers in both standard (3.5”) and large (6”) speaker sizes.

CrosswaysOne™ generates and integrates a random sound masking source by using E-sound® technology which equates to the best sound and most effective sound masking. The system is designed in such a way that individual speaker or component failure will have no impact on the balance of the system. The system’s tremendous flexibility enables it to be customized to any environment. The system requires no on-going maintenance and is manufactured with high levels of recycled content and within stringent environmental guidelines. CrosswaysOne™ is covered by Lencore’s 10 year full warranty.

The Lencore website www.lencore.com has all the tools required for the GSA members to specify and select Lencore Sound Masking for their projects. In addition, all of the available CrosswaysOne™ sound masking products are listed on the www.gsaadvantage.gov website. For government clients the Lencore GSA Contract number is GS-35F-0601U.

About Lencore Acoustics Corp.

Lencore manufactures masking and paging systems including networked systems, in-plenum systems, direct fired systems, networked direct fired systems, centralized, decentralized, and remote sound masking systems. Lencore systems are UL listed for use in air-handling spaces and have been independently tested to meet ASTM standards for speech privacy and ANSI standards for open platform. For more information on Lencore’s revolutionary networked sound masking and paging systems, contact Lencore at info@lencore.com or call 516-682-9292.
