

Lencore

THE LEADING MANUFACTURER OF SOUND MASKING AND ACOUSTICAL PANEL SOLUTIONS.

A GREAT SOUND MAKES NO NOISE®

LENCORE CROSSNET™ SOUND MASKING SYSTEM

Hole Saw - Model BP4

When a networked direct field speaker or system is required, the Lencore CrossNet™ system provides the highest level of sound quality and adjustability and offers the ability for network control. Through the system's managing software, zones can be created and modified for masking and paging. On-going changes and additions to zones can all be handled through the network interface without the need to rewire the system.

When specifying the CrossNet™ small speaker, Lencore's Hole Saw model BP4 can be used to help facilitate the installation.

Bimetal hole saw has shock resistant teeth that stay sharper longer and can easily cut holes into ceiling tiles, wood, plastic, nail embedded woods, plywood, pipe, stainless steel, and any machine-able metal. The positive rake provides more aggressive cutting action and chip clearance for an easy cut.

Hole Saw 3 1/2"

SPECIFICATIONS

Saw Diameter: 3 1/2"

Cutting Depth: 1 1/2"

Material: HSS

Other Systems Also Available

Spectra i.Net™ (Networked), Spectra® (Networked), CrossNet™ (Networked), Crossways™

In-plenum and direct field
all available with paging/music.
