MICROPHONE PRE-AMPLIFIER WITH AUTOMATIC GAIN CONTROL

MODEL G780

FUNCTION

Designed to offer superior paging, the Microphone Pre-Amplifier with Automatic Gain Control (AGC) is Lencore's next generation in high performance technology. The Microphone Pre-Amplifier improves vocal clarity for paging and emergency messaging. Each unit incorporates Automatic Gain Control to deliver greater compression and feedback suppression.

The AGC maintains the same level of amplification for enhanced clarity of paging communications throughout a facility. The built-in AGC automatically increases or decreases the gain of the Microphone Pre-Amplifier to a level that is clearly heard and understood to ensure intended audiences are well informed.

FEATURES AND CAPABILITIES

AGC Output Threshold

- + Three Gain Settings (40db, 50dB, 60dB)
- + Programmable Attack Time
- + Programmable Attack and Release Ratio

REPORTING CAPABILITIES

- + Email wiring issues
- + i.LON Data logger
- + LED switch output

ENCLOSURE

- + Aluminum Housing
- + Dimensions – 5 3/4" x 3 3/4" x 1 1/4"

POWER SUPPLY

- + 48VDC - Input Voltage

WIRE REQUIREMENTS

- + Solid 16 gauge, 2-conductor wire for screw terminals for power

RATED CURRENT CONSUMPTION

- + Input voltage: 48VDC
- + Input current: 5mA
- + Input power: 0.25W
