

## PRODUCT SHEET & SPECIFICATIONS

# n.FORM™ I/O EXPANDER

MODEL G8320

### FUNCTION

The n.FORM I/O Expander is used to add additional I/O to an existing n.FORM system. The G8320 meets the UL 2572 and UL 864 standards to be part of a mass notification system and also is accepted to interface with a fire alarm control panel (FACP). The I/O Expander Rack unit includes 12 supervised digital inputs and 3 relay outputs. The unit can be added to an existing n.FORM rack system. The unit is connected in series with the system's data cable with a Data In and Data Out port.
