SOLID STATE TRANSDUCER, MASKING ONLY

MODELS SDSPKR2

FUNCTION

The SDSPKR2 Solid State Transducer Speaker (masking only) enables sound masking to be distributed uniformly throughout the space, without the visibility of a standard speaker.

A truly hidden speaker, the SDSPKR2 installs directly behind walls, in ceilings, under floors, on glass and on most other solid surfaces. The unit turns an entire structure's surface into a high-quality sound source while remaining completely hidden from view. In fact, the SDSPKR2 can generate sound from solid surfaces by utilizing only 5 to 20 watts. This speaker is thermally protected, so it can also be used in high-output applications.
