

ACCESSORY

PRODUCT SHEET & SPECIFICATIONS

IR HUB (MODEL G964) IR WALL CONTROLLER (MODEL G42)

FUNCTION

Each OP (sound source) of the Spectra i.Net® and n.FORM™ System has an integrated IR Port. This port can be connected to the IR Hub (Model #G964) and IR Wall Controller (Model #G42) to provide up to four individual audio channel controls per i.Net OP eight audio channel controls per n.FORM™ OP.

Using an IR Hub channel, one can make volume and contour control adjustments for masking, paging and music by pointing a remote control at the IR Wall Controller.

This type of application can be typically used for various spaces such as private offices, conference rooms, healthcare facilities, and areas where remote control adjustments are required.
